MORE WAYS TO GET IN ORDER

Protection for lawns. Care for plants.

Bug-N-Order

Seasonal chinch bug and armyworm protection, timed to weather and pest activity.

Root-N-Order Grub Protection

Seasonal grub protection, timed to young-grub activity and lawn conditions.

Root-N-Order Fungus Care

Condition-based care for fungus, brown/large patch, take-all patch and diagnosed root problems.

Canopy-N-Order

Four plant-health visits with insect, mite, diagnosed disease and suitable nutrition care.

Ant-N-Order

One annual fire-ant application with a 12-month service guarantee.

Chinch bug, armyworm and grub guarantees require the full two-treatment program. Single treatments or incomplete programs carry no ongoing guarantee. Timing follows conditions and labels.

Bed-N-Order: $85 minimum / visit; $85 per labor hour for larger agreed jobs. Aeration and top dressing are separately quoted restoration options.

Irrigation inspection - from $75

Check heads, coverage, controller settings, leaks, and seasonal schedules.

THE LAWN-N-ORDER CARE PROMISE

Weeds showing? We keep going.

Active full-program clients with six or more treatments receive free covered-weed follow-ups between scheduled visits.

We assess and spot-treat covered lawn weeds when weather, turf safety and product directions allow. Follow-ups do not replace scheduled rounds. Premier also includes listed lawn pest and fungus protection. Beds and excluded areas follow their own scope.

SIMPLE TO START

- Choose Essential, Core or Premier.
- Confirm lawn size, grass type, pets and safe access.
- Review the quote, service agreement and start date.
- Sign the applicable agreement and separately authorize a card on file with Square before work.

A quote request does not charge a card. Monthly installments are a payment option, not monthly treatment.

CENTRAL TEXAS LAWN CARE

Is your Lawn-N-Order?

A neat cut.
A healthier lawn.
Care all year.

CHOOSE YOUR SERVICE PLAN

Serving Central Texas since 2016

#WeFixLawns

wefixlawnstx.com

THREE PLANS. CLEAR CHOICES.

Mow-N-Order Essential

A neat cut. A yard in order.

From $45 / weekly visit

$55 / biweekly visit at the 3,000 sq ft minimum. Mowing, trimming, edging and blowing. Lawn treatments are separate.

Grow-N-Order Core

Feed the green. Keep weeds unseen.

From $390 / year

Six seasonal lawn-health rounds with suitable feeding, crabgrass prevention and grassy-weed control. Free covered-weed follow-ups. Mowing is separate.

Lawn-N-Order Premier

Protect the roots. Keep your lawn in order.

From $1,325 / year

Core plus lawn insects, grubs, fungus/disease care and annual fire-ant protection. Applied when appropriate. Mowing, aeration and top dressing are separate.

Starting prices before tax. Final written quote after property review. Annual lawn-health programs require six or more treatments. Twelve agreed monthly installments available.

YOUR SIX-ROUND CENTRAL TEXAS PLAN

Seasonal care. A lawn in order.

For established Bermuda, St. Augustine and Zoysia. Timing adapts to weather, soil temperature and lawn condition; every visit follows the selected product directions.

Round / timing	What we do	Why it helps
1 Jan-Feb	**Winter weeds. Spring defense.** Target active winter broadleaf weeds, including henbit, chickweed and clover. Begin crabgrass/annual grassy-weed prevention before germination as soil temperatures approach 55 F for several days, following the selected label.	An early start against crabgrass and spurge seedlings; manage winter broadleaf weeds.
2 Mar-Apr	**Green-up in order.** Feed after active green-up. Review spring prevention and target young crabgrass, other covered grassy weeds, spurge and lingering broadleaf weeds with grass-compatible products.	Support spring growth and address early weeds before they mature.
3 May-Jun	**Feed the green. Fight the weeds.** Grass-specific fertilization and targeted control of young covered grassy weeds, spurge and yellow/purple nutsedge; repeat control when needed and label-permitted.	Support turf density while managing summer weeds and persistent sedges.
4 Jul-Aug	**Summer strength. Smart protection.** Manage covered grassy weeds, spurge and nutsedge when heat and moisture allow. Adjust feeding to turf stress and inspect for chinch bugs, armyworms and root problems.	Keep care responsive to Central Texas heat and spot pest warning signs early.
5 Sep-Oct	**Fall defense. Fewer spring weeds.** Fall prevention as soil temperatures decline toward 70 F for several days, before winter annual grasses and broadleaf weeds establish. Address covered summer grassy weeds where suitable.	Reduce winter weed establishment and prepare the lawn for seasonal transition.
6 Nov-Dec	**Winter tidy. Next season ready.** Target emerged annual bluegrass (Poa annua), rescuegrass and winter broadleaf weeds with grass-compatible control where labeled; review lawn condition and next season's plan.	Manage cool-season weeds without routine nitrogen feeding of dormant warm-season turf.

Seasonal windows are approximate. Grass-compatible liquid or dry applications; not every round is a blanket spray. No routine nitrogen feeding of dormant or stressed turf. Premier includes the listed lawn protection; treatment dates follow conditions and labels.
